RE: 2001 Second Quarter Water Monitoring, Savage Industries, Inc., Savage Coal Terminal, C/007/022-WQ01-2

1. Was data submitted for all of the MRP required sites? YES [x] NO []

2. On what date does the MRP require a five-year re-sampling of baseline water data.

Re-sampling due date Not Required

3. Were all required parameters reported for each site? YES [x] NO []

CV-1-W was the only sample collected. All other sites were No Flow.

4. Were irregularities found in the data? YES [] NO [x]

Wide fluctuations exist in major parameters (SO4, TDS, Sp. Conductivity). It was noted during this review that wide fluctuations exist in the water level as well. No correlation appears to exist between the fluctuation in water level and the mentioned parameters. An attempt will be made to view the Operators sampling technique while collecting the sample.

5. Were DMR forms submitted for all required sites?

1st month, YES [x] NO []
2nd month, YES [x] NO []
3rd month, YES [x] NO []

6. Were all required DMR parameters reported? YES [x] NO []

CV-15-W recorded 'No Discharge.'

7. Were irregularities found in the DMR data? YES [] NO [x]

CV-15-W recorded 'No Discharge.'

8. Based on your review, what further actions, if any, do you recommend?

No further action is necessary for the 2001 Second Quarter Water Monitoring data.
