Re: Stacking Tube Amendment
Savage Coal Terminal
ACT/007/022
Carbon County, Utah

Dear Mr. Haddock:

Enclosed are 3 copies of a proposed amendment to install approximately 361' of new conveyor and 2 steel stacking tubes at the Savage Coal Terminal. The installation of these structures will reduce the need to push the coal over long distances in the existing coal storage area northwest of the preparation plant.

All proposed work will take place within the existing disturbed (coal storage) area, and no changes to the hydrology, soils or vegetation resources are required. This proposal will actually have a positive effect on air quality, since the coal that is presently being moved by dozers and loaders will be transported by covered conveyors and placed into piles by the stacking tubes.

Bond calculations have been completed for this proposed addition. The projected additional reclamation bond cost for this amendment is \$8,195.04. This additional amount, plus the projected cost for the recently approved sampler system, totals \$14,474.99. This is still well within the contingency amount of \$126,250.00 included in the existing bond.
