1. Permits, Change, Transfer, Renewal, Sale

No permit actions with the Division.

2. Signs and Markers

The identification sign was at the main gate to the property. The county road is adjacent to the road to the Savage property. The other road access to the Savage loadout is on a private road. No sign is on this gate.

3. Topsoil

Topsoil pile is partly snow covered. There were no signs of wind or water erosion.

4.a Hydrologic Balance: Diversions

The diversions were functioning as designed. The permittee will need to re-grade the diversions in the spring when the diversions dry out. Sediment has started to settle out within the diversions. Presently, the diversions contain a soup mixture that cannot be cleaned out easily.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds did contain water but were not discharging. No hazardous conditions were noticed during the inspection.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile was inspected. No hazardous conditions were noticed. Small rills are occurring to the out slopes of the pile. This was caused by the snow melt. Re-grading may be required when ground conditions dry out.

8. Noncoal Waste

The loadout was generally clear of non-coal waste material.
