Re: Revised Stacking Tube
Amendment
Savage Coal Terminal
C/007/022
Carbon County, Utah

Dear Pam:

Enclosed are 3 copies of a proposed amendment to install approximately 250' of new conveyor and 1 steel stacking tube and center conveyor support at the Savage Coal Terminal. The installation of these structures will reduce the need to push the coal over long distances in the existing coal storage area northwest of the preparation plant.

Also included with this amendment is a proposed concrete pad to be installed near the pumphouse for the water truck. This pad will drain back to the tank in the pumphouse and help eliminated ponding of overflow or spillage from filling of the water truck.

This amendment has been revised to provide greater detail for the proposed structures. The previous submittal should be disregarded and replaced with this submittal.

All proposed work will take place within the existing disturbed (coal storage) area, and no changes to the hydrology, soils or vegetation resources are required. This proposal will actually have a positive effect on air quality, since the coal that is presently being moved by dozers and loaders will be transported by covered conveyors and placed into piles by the stacking tubes.

RECEIVED

APR 14 2006

Bond calculations have been completed for this proposed addition. The projected additional reclamation bond cost for this amendment is \$9,501.55. The required bond amount for the Savage Coal Terminal is \$2,155,000.00. The bond posted for this site is \$2, 525,000.00; therefore, the additional cost for this project is still well within the existing posted bond amount.

Required C₁/C₂ Forms are enclosed. If you have any questions, or need additional information, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan W. Guy", with a long horizontal flourish extending to the right.
