Subject: Re: Savage CoalTerminal Arch survey

Per our PA, I can comment on this project. It appears that the previous survey you forwarded found no known sites or evidence of high site density.

There is some small potential, as always, for the presence of archaeological sites in areas such as this, so your standard language on this issue would be good to attach. My recommendation for inventory in this case is based on the information I have at hand and my understanding of the area. Other archaeologists, with more or significantly different information or with different mandates might come to a different recommendation.

Per our PA with your office, in our opinion, this email completes your 9-8-404 consultation requirements.

Thank you for considering cultural resources.

Sincerely,

Matt

Hi Matt, these folks did a literature search and a survey for their permit area in 1980. No sites were found to be located in the permit area. I've included a copy of my memo that addresses the review of the cultural resources and biology. I will fax you the pertinent info. Please advise if you concur.....Joe
