Task 2549

OK

From: Dana Dean
To: Priscilla Burton
Date: 7/20/2006 4:25:36 PM
Subject: Re: Restart Prep Plant (add 4 conveyors) Task ID # 2549 Savage

Priscilla,

This amendment does not have any effect whatsoever on hydrology. The notion of restarting the prep plant with the new settling ponds, etc. is covered in task 2524. I don't even think this warrants a memo explaining that there are no hydro changes.

Thanks,
Dana

Team,

As you may know, a violation was written last Friday to Savage for beginning conveyor construction without authorization. Savage is very eager to continue with the construction of concrete footers for the rest of the conveyors.

Please respond to this email to let me know whether
1) you have looked at the plan and
2) whether there are any deficiencies in your section of review.

Then we can assess whether to allow them to proceed with a verbal approval and follow with a commitment list or whether to hold up construction until all deficiencies are addressed.

I will be away on vacation next week when this task is due (7/28). If at all possible, I would appreciate your final reviews by 7/21, Friday a.m. So that I can put together either a deficiency letter or an approval letter that day.

Thanks,
Priscilla.
