Re: Request to extend submittal date for plant overflow pond.

Dear Pam,

This e-mail is to confirm my request to extend the resubmittal on the plant overflow pond for the Savage Coal Terminal to December 3, 2007.

The reason for the extension request is to allow time to complete the re-evaluation and re-write of the hydrology chapter for the revised mine plan. There is a good possibility the new calculations will show this pond won't be required, and it would be a waste of everyone's time to review it again and find it not to be necessary.

Thank you for your consideration.
