Re: Proposed Culvert Addition
Savage Coal Terminal
C/007/022
Carbon County, Utah

Dear Mr. Haddock:

Enclosed are 3 copies of a proposed amendment to add a new culvert at the Savage Coal Terminal. The proposed culvert will be installed in an existing drainage area on the access road (PR-13) to the settling ponds. This area has a very small amount of runoff, but it does tend to collect water and create muddy conditions on the road crossing. The culvert will drain into the existing disturbed ditch (CD-6), which flows to Sediment Pond No. 1.

Since this is a simple culvert installation in a drainage area already designated to flow to the sediment ponds, there is no need to revise pond or drainage calculations. The reclamation cost would also be insignificant compared to the overall bond and contingency.

Revised pages and plates for the approved MRP are included with this submittal. A C₁/C₂ Form is also enclosed. If you have any questions, or need additional information, please let me know.

Sincerely,

John M. Walters
General Manager
