Subject: Conditional Approval of Savage Coal Terminal, C/007/0022, Culvert Addition, Task ID #3282

Dear Mr. Walters:

The Division has reviewed the amendment submitted on May 11, 2009 proposing to add a new drainage culvert within the disturbed area of the site to the northeast of the office building and adjacent to an access road to the coal fine slurry ponds on the northwest portion of the property. The area consists of a low spot of vegetation that has historically collected minor amounts of water and attracted mosquitoes. Savage has proposed this culvert in order to better facilitate drainage in the area.

The above-referenced amendment is conditionally approved upon receipt of 4 clean copies prepared for incorporation. Please submit these copies by June 12, 2009. Once we receive these copies, final approval will be granted, at which time you may proceed with your plans.

A stamped incorporated copy of the approved plans will also be returned to you at that time, for insertion into your copy of the Mining and Reclamation Plan. This modification does not necessitate an update to the Technical Analysis.

If you have any questions, please call me at (801) 538-5262 or April Abate at (801) 538-5214.

Sincerely,

James D. Smith  
Permit Supervisor
