Karla and John,

We discovered an error relating to Chapter 7 referencing a commitment to baseline water quality sampling. Apparently, there is no existing commitment to sample baseline parameters. I have not been able to find any information relating to baseline water quality sampling from researching the information in the MRP.

However, I do feel that it is important for Savage to get on a 5-year monitoring program as soon as possible. At some point in the near future, I would like to perhaps get your input and work on establishing a 5-year baseline program for Savage. This will require an amendment to their MRP. Thanks and sorry for any initial confusion.

April

Hey, Karla...

I need some information to complete a review of the 2008 Savage Annual Report.

There is a commitment in the Chapter 7 text pp. 7-26 and 7-36 that baseline parameters have to be analyzed for every five years.

The AR states that this commitment was not done this year, (i.e., 2008).

When was the last baseline monitoring reported to the Division ?

Thank you.
