Hello Mr. Nielsen,

It was nice to meet you yesterday and thank you very much for taking the time to accompany me on the inspection yesterday. I wanted to give you some clarification on the water monitoring parameters that I was requesting be incorporated into the MRP as a baseline parameter list. This was one of the items requested in the 2010 Savage annual report. The baseline list, which are to be collected every 5 years prior to permit renewal can be added to Table 7-17 or as a separate table in Chapter 7 of the MRP - however you choose to do it. The text should also be amended to discuss the frequency of when the baseline parameters are to be collected. I believe JBR Consulting performed the most recent baseline sampling. You may want to consult with them on this issue.

Thanks again and best regards,

April
