DEPARTMENT OF NATURAL RESOURCES

MICHAEL R. STYLER
Executive Director

Division of Oil, Gas and Mining

JOHN R. BAZA
Division Director

Inspection Report

Permit Number:	C0070022
Inspection Type:	PARTIAL OVERSITE
Inspection Date:	Wednesday, August 14, 2013
Start Date/Time:	8/14/2013 8:00:00 AM
End Date/Time:	8/14/2013 12:00:00 PM
Last Inspection:	Tuesday, July 16, 2013

Representatives Present During the Inspection:	
OGM	Steve Demczak
OGM	Flynn Dickinson
Company	Victor Fausett

Inspector: Steve Demczak

Weather: Sunny, 80's

InspectionID Report Number: 3588

Accepted by: jhelfric

8/28/2013

Permittee: **SAVAGE SERVICES CORP**

Operator: **SAVAGE SERVICES CORP**

Site: **SAVAGE COAL TERMINAL**

Address: **6340 S 3000 E STE 600, SALT LAKE CITY UT 84121**

County: **CARBON**

Permit Type: **PERMANENT COAL PROGRAM**

Permit Status: **ACTIVE**

Current Acreages

153.46	Total Permitted
132.50	Total Disturbed
	Phase I
	Phase II
	Phase III

Mineral Ownership

- Federal
- State
- County
- Fee
- Other

Types of Operations

- Underground
- Surface
- Loadout
- Processing
- Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The roads were well maintained with trucks hauling coal into the facilities.

The division gave approved for the maps and notification by the permittee for crude oil storage and loading oil crude oil at the Savage coal terminal. The permittee will submit to the Division an AS-built map after crude Oil storage facilities have been constructed.

The permittee was in the process of construction and grading a train track spur for the loading of crude oil on to rail cars.

2. Signs and Markers

Identification sign was at gate to permit area. The information meets the minimum requirements of the R645 Coal Rules.

3. Topsoil

I inspected the topsoil piles with no signs of wind or water erosion. The topsoil piles were stable.

4.a Hydrologic Balance: Diversions

The permittee has been cleaned several diversions since the inspection. This is an ongoing process at this facility. The culverts and diversions were open and would handle the design rain event.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected all the sediment ponds. All ponds were dry except the lower pond. This lower pond is used for dust control. The permittee pumps water into water truck for dust suppression. I did not see any signs of hazardous conditions to the sediment ponds. The ponds are incised and were stable.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile is gone except for a few cubic yards. There may be enough material to fill one semi truck. No hazardous conditions were noticed.

8. Noncoal Waste

The site was clear of non-coal waste materials.

16.b Roads: Drainage Controls

All road culverts and diversions were inspected and were open for water flow. Several of the diversions were recently cleaned out.

18. Support Facilities, Utility Installations

The preparation plant was not being used during the inspection. The preparation plant was used this month by Arch Coal Company in August.
