

State of Utah

DEPARTMENT OF NATURAL RESOURCES

MICHAEL R. STYLER
Executive Director

Division of Oil, Gas and Mining

JOHN R. BAZA
Division Director

Inspection Report

Permit Number:	C0070022
Inspection Type:	PARTIAL
Inspection Date:	Wednesday, September 2, 2020
Start Date/Time:	9/2/2020 9:00:00 AM
End Date/Time:	9/2/2020 1:00:00 PM
Last Inspection:	Thursday, August 6, 2020

Representatives Present During the Inspection:
OGM Karl Houskeeper

Inspector: Karl Houskeeper

Weather: Clear Skies, Temp. 77 Deg. F.

InspectionID Report Number: 6766

Accepted by: SCHRISTE
9/30/2020

Permitee: **SAVAGE SERVICES CORP**
 Operator: **SAVAGE SERVICES CORP**
 Site: **SAVAGE COAL TERMINAL**
 Address: **2025 EAST 5000 SOUTH, PRICE UT 84051**
 County: **CARBON**
 Permit Type: **PERMANENT COAL PROGRAM**
 Permit Status: **ACTIVE**

Current Acreages

153.46	Total Permitted
132.50	Total Disturbed
	Phase I
	Phase II
	Phase III

Mineral Ownership

- Federal
- State
- County
- Fee
- Other

Types of Operations

- Underground
- Surface
- Loadout
- Processing
- Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The Savage Energy Terminal Complete Inspection was conducted un-attended according to the Division's current policy during the COVID 19 pandemic. Spoke with Vic Fossat and LuAnn Koch (Savage) at the close of the Partial Inspection

There was no oil trans-loading occurring during the complete inspection.

Site activity was slightly increased from the prior inspection, but still at a minimum. The site was well maintained.

Inspector's Signature:

Karl Houskeeper,
Inspector ID Number: 49

Date Wednesday, September 2, 2020

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

	Evaluated	Not Applicable	Comment	Enforcement

21. Bonding and Insurance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
22. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2. Signs and Markers

The law requires that entrances leading into the permit area be identified by signs that give the name, address, phone number and permit number. These features were present on the two identification signs at the Savage Energy Terminal. The signs are in compliance with the requirements of the law.

3. Topsoil

Topsoil pile was observed during the partial inspection.

Protection is provided by vegetation and an earthen berm. In addition a section of silt fence is installed on the West side of the pile. This silt fence is being used as a wind barrier to help minimize coal fines from accumulating on the topsoil pile.

Vegetative cover looked good for this area.

4.a Hydrologic Balance: Diversions

Diversions throughout the Savage Energy Terminal were checked.

All diversions were open and functional.

The diversion at the base of the truck dump has some accumulations that are starting to build and should be monitored.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The large sediment pond was dry at the time of the inspection. A sediment delta has formed at the inlet side of the pond. This happens as sediment laden flows enter the pond and drop out rapidly.

The discharge pond contained water (Pond #6). Sediment levels were not apparent visually.

4.e Hydrologic Balance: Effluent Limitations

Discharge monitoring reports are submitted to DEQ electronically. A copy of the submission is kept on site. The information submitted to DEQ did not indicate any problems.

5. Explosives

This is a coal storage, processing and load out. There is no explosives stored on site.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile sign is in tact and contains the required information.

A small amount of refuse material is in the refuse pile site. This material is graded and compacted.

8. Noncoal Waste

The site was free of noncoal waste items.

14. Subsidence Control

This is a coal storage, processing and load out. There is no subsidence associated with this site.

16.a Roads: Construction, Maintenance, Surfacing

Roadways are well graded and maintained.
