

PRO/007/033 #2

August 27, 1987

TO: John Whitehead, Permit Supervisor  
FROM: James R. Fricke, Reclamation Hydrologist *JRF*  
RE: Wildcat Loadout Sediment Pond Inspection  
Frequency Amendment, Andalex Resources, Inc.,  
PRO/007/033, Folder #2 and #6, Carbon County, Utah

The operator has submitted a second request to amend the sediment pond inspection from weekly to quarterly frequency. The operator intends to utilize boney as riprap protection for the pond inlets.

Before Division approval is granted, the operator must provide documentation as to the adequacy of the riprap material (see letter to Andalex Resources dated 6/9/87). Riprap must meet the specifications of UMC 817.72(b)(1)(4).
