RE: Completeness Review (Submittal Received October 17, 1988),
Andalex Resources, Wildcat Loadout, PRO/007/033, Folder #2,
Carbon County, Utah

Andalex Resources, Inc. submitted completeness information on October 17, 1988. Two regulations in my third Completeness Review (dated September 30, 1988) were still outstanding:

UMC 783.24 Maps: General Requirements and
UMC 784.16 Reclamation Plan: Ponds, Impoundments,
Banks, Dams and Embankments.

UMC 783.24 The permit area is still depicted incorrectly. The permit area must include the proposed extension Diversion Ditch UD-1 and the permanent impoundment located nearby. Diversion Ditch UD-8 that continues to flow to the Beaver Creek Coal Company warehouse must also be included in the permit area. Right-of-entry information for diversions UD-1 and UD-2 is currently being revised by Andalex and processed by the BLM. The "application" to the BLM for this revision should be included in the submittal; the approval will need to be included later.

UMC 784.16 Adequately addressed.
