Dear Mr. Glasson:

Re: Third Completeness and Technical Deficiency Review, Andalex Resources, Wildcat Loadout, PRO/007/033, Folder #2, Carbon County, Utah

Attached is the Division's Third Completeness and Technical Deficiency Review for the Wildcat Loadout Permit Application Package (PAP). The plan still has significant deficiencies which must be addressed prior to the application being determined complete. The attached review is the same material with minor editorial changes that was transmitted to you in draft form on Wednesday, September 28, 1988.

As we discussed in our phone conversation of September 29, the response to all completeness issues will be submitted to the Division no later than October 14, 1988. Response to all technical deficiencies will be submitted no later than October 21, 1988.

Please feel free to contact me if you should desire to meet with any of the technical staff involved in this review to assure there are no misunderstandings or issues which are not clarified prior to the next response. It is absolutely imperative that the next response be complete and adequate and not require further modification.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Lowell'.
