Attached is the Division's Initial Completeness Review (ICR) for the Andalex Resources, Inc. Wildcat Loadout Permit Application Package (PAP) submitted to this office in early January, 1988.

Comments from the Division of Water Rights, the State Historic Preservation Officer and the U.S. Fish and Wildlife Service are also enclosed. When comments are received from other state and federal agencies, they will be forwarded to you.

In order to complete permitting of the Wildcat Loadout in a timely manner, please assure that your response completely addresses each deficiency contained in the ICR. The complete response must be submitted to the Division no later than April 29, 1988.
