

inspection report

Permit No. ACT/007/033

Inspection Date 17 April 1991

Permittee/Operator Name Andalex Resources, Inc.

Business Address P.O. Box 902

City Price State Utah Zip 84501

Mine Wildcat Loadout Surface Underground Other

County Carbon State Utah

Company Official(s) John Pappas, Bert Jeanselme

State Official(s) Jess Kelley, Hugh Klein

Time of inspection 9:00 a.m. p.m. to 11:00 a.m. p.m. Partial Complete

Date of last inspection 28 March 1991 Weather conditions Clear and windy

Acreage 100 Permitted 60 Disturbed Regraded Seeded 60 Bonded

Enforcement Action None

COMPLIANCE WITH PERMITS AND PERFORMANCE STANDARDS

INSPECTION REPORT COMMENTS

Permit No. ACT/007/033

Inspection Date 17 April 1991

Please number comments to correspond with topics on previous page.

3. TOPSOIL

Topsoil stockpile adjacent to the main gate is in good condition. Stockpile is starting to show an abundant growth of grass and some leafy plants.

4. HYDROLOGIC BALANCE

(b) Diversions-Waste pile diversion (Amendment 90B) is clean and in good repair.

Maintenance work on this diversion is now proceeding in the head of the canyon where it lies. Work consists of berm repair and maintenance.

(c) Sediment Ponds and Impoundments-All sediment ponds are clean and almost completely dry. Banks of permanent impoundment (Amendment 90A) are beginning to show an abundant growth of grass. Permanent impoundment, like other sediment control structures, is dry.

(d) Other Sediment Control Measures-Straw bales have been placed at the end of the waste pile diversion to tie in with the straw bales already present. This was recommended by Bill Malencik of DOGM during a February 19, 1991 inspection visit. These bales will serve to slow runoff from this diversion and prevent erosion while the banks of the diversion are undergoing revegetation.

13. REVEGETATION

As mentioned previously, topsoil stockpile and impoundment banks are sustaining plant growth. Vegetation is coming in well in area disturbed by upper part of waste pile diversion.
