Re: Change of Ownership and Control – Andalex Resources, Inc.

Dear Pam:

As we have discussed, on behalf of Murray Energy Corporation, enclosed is a news release regarding the recent change in ownership and control of Andalex Resources, Inc. ("Andalex"). Murray Energy Corporation has purchased all of the shares of the common stock of Andalex and its subsidiaries, effective as of August 9, 2006. The Utah operations of Andalex including the Crandall Canyon Project, West Ridge Project, Tower Division, and the Wildcat Loadout will be operated by UtahAmerican Energy, Inc, the Utah subsidiary of parent Murray Energy Corporation. This change in ownership and control may be followed up with a name change regarding the permitted operator of each of the former Andalex operations. We understand that this second phase of the change over would involve a transfer, assignment or sale (TAS) of permit rights subject to approval of the Division pursuant to R645-303-300. If Murray Energy Corporation decides to change the names of the permittees, a TAS application for each of the former Andalex operations will be submitted for Division approval. If Murray Energy Corporation decides not to change the current names of the permittees, we will be providing the Division with updated ownership and control information in the near future.

Thank you for your assistance in this matter. Please let Dave Shaver or me know if you have further questions.

Very truly yours,

Denise A. Dragoo

**MURRAY ENERGY CORPORATION**  
**ACQUIRES ANDALEX RESOURCES, INC.**

Cleveland: Murray Energy Corporation ("Murray Energy"), headquartered in Cleveland, Ohio, has announced the purchase of all of the shares of the common stock of Andalex Resources, Inc. and its four subsidiary companies from Andalex Hungary Management Limited Liability Company ("Andalex").

The former Andalex properties will be owned and operated by Murray Energy's Subsidiary, UtahAmerican Energy, Inc. ("UtahAmerican Energy"). Two of the mines are co-owned with the Intermountain Power Agency ("Intermountain Power"), which is managed by the Los Angeles Department of Water and Power. "We are looking forward to a long term, mutually beneficial relationship with our new partner and all of our customers", said Mr. Robert E. Murray, Chairman, President and Chief Executive Officer of Murray Energy.

**FOR IMMEDIATE RELEASE**

**August 9, 2006**

**Page 2 of 2**

The new UtahAmerican Energy properties consist of three underground coal mining operations and a transloading facility located in Carbon and Emery Counties, Utah. They are the Crandall Canyon Project, West Ridge Project, and Tower Division, as well as the Wildcat Loadout on the Utah and Union Pacific railways. Crandall Canyon and West Ridge are fifty percent co-owned by Intermountain Power, which operates the huge, over five million ton per year, Delta Power Plant in Utah.

"This acquisition provides many synergies for Intermountain Power and Murray Energy", stated Mr. Murray. "First, all three purchased mines are operated using very complex underground longwall mining techniques. Murray Energy is the second largest longwall mining Company in the United States, and we have the expertise to operate these mines in a very safe and efficient manner", he advised.

"Secondly", Mr. Murray added, "for nearly five years UtahAmerican Energy has owned the very large Lila Canyon Mine coal reserves near the purchased properties. For all of this time UtahAmerican Energy has been attempting to obtain its final mining permit from the Utah Division of Oil, Gas and Mining, which is expected this year, notwithstanding the destructive and delaying tactics of the radical Southern Utah Wilderness Alliance. This acquisition will provide a very beneficial transition for Murray Energy into our high quality Lila Canyon reserves, when the Crandall Canyon Mine, which has limited reserves, is depleted. We will be able to supply high quality coal to our electric customers and partner for many years, plus serve new ones when Lila Canyon is soon developed", said Mr. Murray.

Murray Energy has deployed a team of experts to integrate the newly acquired UtahAmerican Energy operations into its diversified portfolio of mining Companies. Mr. Douglas H. Smith will remain in the organization as President of UtahAmerican Energy, while Mr. John C. Bradshaw, former Vice President, Finance, will be joining Murray Energy in Ohio as Treasurer, Tax Manager, and Internal Auditor. Mr. Karl E. Yoder will remain as General Manager of Sales for UtahAmerican Energy.

"Having operated underground mines in Utah from 1968 to 1972, I am looking forward to our return", said Mr. Murray. "We intend to provide outstanding and reliable service to Intermountain Power and our many new customers, and to provide good employment and the best possible quality of life to the people and communities of Carbon and Emery Counties", he concluded.
