Jerriann,

Based on your 06/18/2007 e-mail (attached .rtf file), the Midterm review was finalized and a deficiency letter sent on 6/28/2007, listing one deficiency on bonding. I'm attaching your Tech Memo (attached .doc file) to this e-mail and CC'ing Dave Shaver: he may be able to address this Upper Colorado River Endangered Fish Recovery Program deficiency in his response. Otherwise, we may need to do a DO. The Wildcat expansion was in the works when this was discussed in June but it appears to be dead in the water now.

JIM
