**USING THE BEST TECHNOLOGY  
CURRENTLY AVAILABLE TO MINIMIZE  
DISTURBANCE AND IMPACT**

See R645-301-310.

R645-301-333.100.

**PROTECTION OF THREATENED AND  
ENDANGERED SPECIES**

There have been no known threatened or endangered species within the permit area. See R645-301-310.

With regard to the Colorado River Endangered Fish Recovery Program, surface consumption is limited to water sprayed on the haul roads for dust suppression, and water used for showers and toilets. This water is all hauled in under contract with D&D Trucking, who purchase the water from the Price River Water Improvement District. Daily records kept at the loadout show that for the year 2007 D&D delivered 677 loads, each with 4000 gallons for a total of 2,708,000 gallons. The other potential source of consumption is evaporation from the sediment ponds. Unlike slurry ponds or treatment ponds, the sediment ponds are normally dry and the evaporation amount is minimal.

**R645-301-341.**

**REVEGETATION**

Revegetation

Revegetation will be accomplished by Andalex or under Andalex's direct supervision and under the recommendations of the regulatory authority. A seed mixture has been developed and can be found in this chapter. This mixture was developed by estimating vegetative types in the sagebrush/grass reference area established by DOGM and Andalex. Please refer to Appendix I and Plate 1.

**R645-301-341.100**

**SCHEDULE AND TIMETABLE**

Schedule of Revegetation

The seeding of native flora (consisting where possible of deer browse species), will commence as soon as is practical following regrading and topsoil replacement. This revegetation will help stabilize the soil and the fill quickly. Revegetation will be accomplished by Andalex or under Andalex's direct supervision and under the recommendations of the regulatory authorities. Revegetation will occur during the first fall planting season following the regrading and topsoil redistribution. Please refer to Revegetation Schedule.
