Hi Steve, thanks for the response. I realize it's a pretty busy time of year for you guys as well. I have discussed with our consultants and asked them to please give me a timeframe on when they think we will have something. I hope to hear from either by the end of this week or the first part of next week. As soon as I can get somewhat of a firm commitment from them, I will be able to establish a deadline. I appreciate your patience and willingness to work with us on this.

Thanks again,

Kit

Afternoon Kit,

I apologize for the delayed response. Per our conversation last Thursday, we'll go ahead and extend the deadline to submit the response to the mid-term review. Let me know what time frame you're looking at when you hear back from your consultants. The current due date is January 31st.

Regards,  
Steve

Hi Steve, after a fairly exhaustive search on both my end and yours, I/we have been unable to find the required existing information, calculations and drawings of Pond B as we discussed in our phone conversation earlier. I spoke with Dave Shaver, Mike Glasson and Dan Guy, none of which had any usable information or materials. I've effectively hit a dead end at every turn as we feared. As we also discussed as our final option, this will require basically reverse engineering the pond to create the drawings and design specifications. Needless to say, we will have to extend the deadline for the submittal pending the completion of the work that needs to be done on Pond B. I have talked with our consultants and they are onboard but could not provide me a timeframe at this point. I will definitely keep you updated as I get updates from them. If you have any questions or comments, please don't hesitate to contact me.

Thanks again,

Kit
