1. Permits, Change, Transfer, Renewal, Sale

Currently, there is no permitting action under review with the Division.

2. Signs and Markers

I inspected the identification sign at the main gate to the property. The information complies with the requirements of the R645 Coal Rules.

3. Topsoil

I inspected the topsoil piles which were stable with no signs of wind or water erosion. The topsoil is protected by a berm.

4.a Hydrologic Balance: Diversions

Diversions and culverts are open and would function as design. Many of the diversions were recently clean out.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds. No hazardous conditions were notice during the inspection. The embankments were stable. The sediment ponds are incised. These ponds contain little to no water. It is unlikely these ponds will discharge in the near future.

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile. It was stable and no hazardous conditions were notice during the inspection. Surface drainage is diverted always from the refuse pile.

8. Noncoal Waste

The site was clear of trash and other non-coal waste materials.

16.b Roads: Drainage Controls

Road drainage was functioning as design. Diversions and culverts were open.

18. Support Facilities, Utility Installations

There is no change to the surface facilities or utilities installations since the last inspection. The site is idle.
