1. Permits, Change, Transfer, Renewal, Sale

The Division review of the mid-term Response is scheduled to be reviewed by February 13, 2017.

2. Signs and Markers

I inspected the identification sign and it meets the requirements of the R645 Coal Rules at the Wildcat. See Photo

3. Topsoil

The topsoil piles were snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated.

4.a Hydrologic Balance: Diversions

Diversions and culverts were completely snow covered. Due to low temperatures it is unlikely that the diversions had water flow.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds are snow covered. No sediment pond was discharging during the inspection. It is unlikely that these sediment ponds will discharge in the near future. Embankments, inlets and outlets are snow covered.

4.c Hydrologic Balance: Other Sediment Control Measures

Sediment control measures are snow covered.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile was snow covered. I did not see any hazardous conditions.

8. Noncoal Waste

I did not see any non-coal waste on top of the snow.

16.a Roads: Construction, Maintenance, Surfacing

Only the main road into the property was open. All other roads were snow covered.
