1. Permits, Change, Transfer, Renewal, Sale

There are no permitting actions with the Division at this time. The Division is reviewing the Annual Report.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

4.a Hydrologic Balance: Diversions

The diversions and culverts have been clean out and re-graded since the last inspection. The west side of the property needs some maintenance. Some sediment has started to build-up in these structures.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

4.c Hydrologic Balance: Other Sediment Control Measures

The waddles were inspected and functioning as designed. See Photo

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The refuse pile has been inactive for several years. See Photos

8. Noncoal Waste

The east side of the property had no non-coal waste issues. The west-side has some non-coal waste material that need to be removed.

16.a Roads: Construction, Maintenance, Surfacing

Roads on the west side need to be re-graded.

16.b Roads: Drainage Controls

Road drainage on the Westside needs maintenance of diversions and culverts. Some sediment has started to build-up within these structures.
