2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm.

4.a Hydrologic Balance: Diversions

I inspected diversions and culverts throughout the property. They were open and would function as designed in a storm event. See Photos.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. Some sediment ponds contain a small amount of water. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

4.c Hydrologic Balance: Other Sediment Control Measures

Silt fences and wattles were inspected and comply with the requirement of the R645 Coal Rules. These structures are used for preventing coal fines leaving the disturbed area. There are no coal piles presently on this site.

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The refuse pile is inactive. See Photos

8. Noncoal Waste

The property was clear of non-coal waste materials such as oil, trash and grease cans.

10. Slides and Other Damage

No slides or other damage was noticed during the inspection. The Loadout appears to be stable.

15. Cessation of Operations

The loadout is in temporary cessation.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem.

Permit Number: C0070033
Inspection Type: PARTIAL
Inspection Date: Thursday, November 30, 2017

16.b Roads: Drainage Controls

I inspected the road diversions and culverts throughout the property. They were functioning as designed. See Photos
