### **1. Permits, Change, Transfer, Renewal, Sale**

The Division has received a permit transfer application and is scheduled to be review by October 31, 2018.

### **2. Signs and Markers**

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo After the permit transfer is approved, new signs will be needed to update the required information.

### **3. Topsoil**

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

### **4.a Hydrologic Balance: Diversions**

I inspected diversions and culverts throughout the property. They were open and would function as designed during a storm event. The structures were recently re-graded and cleaned out of sediment. See photos

### **4.b Hydrologic Balance: Sediment Ponds and Impoundments**

I inspected the sediment ponds throughout the property. The permittee reconstructed the inlets to two sediment ponds located at the North-West side of the property. Major erosion had occurred due to the recent rainstorm and the sandy soil. Erosion to these structures happens frequently, and new design is recommended. This year (a dry year) these structure were reconstructed twice.

### **7. Coal Mine Waste, Refuse Piles, Impoundments**

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The diversions were functioning as designed. The refuse pile is inactive at this time.

### **8. Noncoal Waste**

The property was clear of non-coal waste materials such as oil, trash and grease cans.

### **16.b Roads: Drainage Controls**

I inspected the road diversions and culverts throughout the property. They were functioning as designed. See Photos
