1. Permits, Change, Transfer, Renewal, Sale

The permit transfer is scheduled to be reviewed by November 9, 2018.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo The new permittee will need to update the identification signs once the permit transfer is approved.

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm

4.a Hydrologic Balance: Diversions

I inspected diversions and culverts throughout the property. They were open and would function as designed in a storm event.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds have been reconstructed for the second time in two months. Every major rain storm causes erosion to the inlets due to the composition of the soil which is sandy.

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The refuse pile is inactive.

8. Noncoal Waste

The site was clean of non-coal waste materials such as trash, oil cans, wood and scrap materials.

10. Slides and Other Damage

No slides or other damage was noticed during the inspection. The mine site and loadout appear to be stable.
