RE: Initial Completeness Review
Banning Loadout PRO/007/034

Dear Susan:

The deficiencies that the Division identified in their initial complete review have been addressed and I have enclosed thirteen (13) copies of our response. Also, I have included insertion instructions for this response. The technical deficiencies identified have been addressed and are included with this response, except for the coal analysis. When the Division deems the permit application complete, I will publish the public notice.

If you have any question, please contact me.

Sincerely,

A handwritten signature in cursive that reads "C.P. Allen".

C.P. Allen
Mine Engineer
