RE: Amendment to Banning Loadout Permit, ACT/007/034, (Soldier Creek Coal Company)  
NOV # N96-39-5-1

96A #2

Dear Steve:

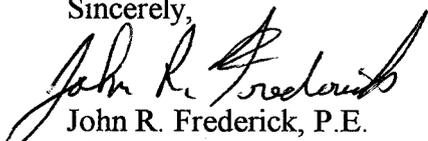

The enclosed amendment is being submitted as remedial action for NOV96-39-5-1 issued on November 18, 1996. This amendment corrects locations and further delineates runoff control structures at the Banning Loadout. In addition, for purposes of convenience, a noncoal waste area has been added east of #1 conveyor. Also, the reclaim and escape tunnels have been added and the non-freezing agent storage tank, near the silo, has been removed.

With respect to the specific nature of violation NOV96-39-5-1, all water diversions and treatments have been shown on the enclosed maps, Exhibit 7-1 (revised 11/19/96) or Exhibit 7-1a (new submittal). Exhibit 7-1 has been revised by adding a line symbol to delineate the berms and a crosshatch symbol to delineate the embankment areas. A new map, Exhibit 7-1a, is included to show sediment control structures along portions of the access road which are within the permit area.

Please replace Exhibit 7-1 with the enclosed Exhibit 7-1 (revised 11/19/96) and add Exhibit 7-1a in the current Banning Loadout permit. Five copies of each exhibit have been included herein.

Thank you for your professionalism and the helpful manner in which you have addressed this issue. If you any questions or concerns, please feel free to contact me at your convenience.

Sincerely,

  
John R. Frederick, P.E.  
Technical Services Manager
