PERMIT NUMBER: ACT/007/034

DATE OF INSPECTION: 1/25/99

(Comments are Numbered to Correspond with Topics Listed Above)

1. PERMIT-

There is one minor amendment being review by the Division which is the temporary coal storage area for Dugout mine. This is the second review by the Division.

2. SIGNS AND MARKERS -

Identification signs meet the requirement of the R645 Coal Rules. The perimeter markers were spot-checked and are located around the perimeter of the disturbed area.

4A. DIVERSIONS -

The diversions were spot-checked for performance standards. It was determined that these diversions comply with the requirements of the Mining and Reclamation Plan and the R645 Coal Rules. No water was flowing within the diversions during the inspection.

4B. SEDIMENT PONDS -

The sediment pond was not discharging during the inspection. It is highly unlikely that a discharge of water will occur in the near future. This sediment pond did contain a small amount of water. The Banning sediment pond has never discharged. There were no signs of any hazardous conditions occurring to the sediment ponds during the inspection. This is an incised pond.

4C. OTHER SEDIMENT CONTROL MEASURES -

The Banning Loadout facility uses silt fences and straw bales on figure 7-1 and 7-2 as its alternate sediment control measures as approved by the Division. These areas were spot-inspected and complied with the R645 Coal Rules.

5. EXPLOSIVES -

No explosives boxes are on the property.

7. REFUSE PILES -

The permittee has submitted an amendment to store waste rock temporarily from Dugout Mine.

8. NON-COAL WASTE -

The area was clear of non-coal waste material.

18. SUPPORT FACILITIES -

No new surface facilities were installed.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
