Cc: Priscilla Burton <priscillaburton@utah.gov>, "Christensen, Steve" <stevechristensen@utah.gov>

Hello,

The Division staff have completed the review of the 2019 Annual Report for the Banning Loadout. Attached is a copy of the review with comments.

No hard copy will follow.

Thank you for your diligence in completing the Annual Report.

OPERATOR COMMENTS

REVIEWER COMMENTS Met Requirements Did Not meet Requirements

The sediment pond quarterly inspections were performed on the following dates:
First Quarter 02/08/2019.
Second Quarter 05/03/2019.
Third Quarter & Annual 09/03/2019. (P.E. Certified)
Fourth Quarter 11/11/2019.
The requirements have been met. (KRH)
PB, 3/31/2020. Impoundment inspections indicate that last tamarisk is still actively growing in the pond, despite herbicide spraying in

previous years. Local USU extension agents have experimented with various tamarisk control methods. They found that the best practice for tamarisk removal is to cut down the plant and apply the herbicide to the stump. The method is described at this link <https://riversedgewest.org/what-tamarisk>

FUTURE COMMITMENTS AND CONDITIONS

The following commitments are not required for the current annual report year, but will be required by the permittee in the future as indicated by the "status" field. These commitments are included for information only, and do not currently require action. If you feel that the commitment is no longer relevant or needs to be revised, please contact the Division.

Title: AIR QUALITY

Objective: Review Emission Inventory

Frequency: While Active

Status: Not Active

Reports: While active, the emission inventory for the operation is submitted to the Utah Division of Environmental Health, Bureau of Air Quality. A copy of this emission inventory will be included in the annual report.

Citation: Chapter 4, page 4-10 and Chapter 5, page 5-13

Title: COAL SAMPLING

Objective: Monitor Coal Quality

Frequency: Annually while active

Status: Not Active

Reports: On an annual basis, all coal-quality monitoring data collected from the site during the previous year will be summarized and submitted to the Division. Raw data received from the laboratories will also be included, along with an interpretation of the analytical results and any proposals for changes in the monitoring plan. These data and interpretations will be included with the annual report that presents the surface - water data.

Citation: Chapter 6, page 6-5 and Chapter 7, page 7-11

REPORTING OF OTHER TECHNICAL DATA

Please list other technical data or information that was not included in the form above, but is required under the approved plan, which must be periodically submitted to the Division.
