inspection report

Partial Inspection Date: April 20, 1994
 Complete Time: 8:00 am pm to 11:30 am pm
 Exploration Date of Last Inspection: 3/17/94

Mine Name: Sunnyside Refuse County: Carbow Permit Number: Act 007/035
 Permittee and/or Operator's Name: Sunnyside Cogeneration Assoc.
 Business Address: P.O. Box 58087, Salt Lake City, Ut 84158-0087
 Type of Mining Activity: Underground Surface Prep. Plant Other
 State Officials(s): Bill Malencik
 Company Official(s): None
 Federal Official(s): None

Weather Conditions: Clear / Temp Upper 60°
 Existing Acreage: Permitted- 310 Disturbed- 202 Regraded- _____ Seeded- _____ Bonded- 202
 Increased/Decreased: Permitted- _____ Disturbed- _____ Regraded- _____ Seeded- _____ Bonded- _____
 Status: Exploration / Active / Inactive / Temporary Cessation / Bond Forfeiture
 Reclamation (Phase I / Phase II / Final Bond Release / Liability _____ Year)

REVIEW OF PERMIT, PERFORMANCE STANDARDS & PERMIT CONDITION REQUIREMENTS

Instructions

- Substantiate the elements on this inspection by checking the appropriate performance standard.
 - For complete inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check N/A.
 - For partial inspections check only the elements evaluated.
- Document any noncompliance situation by referencing the NOV issued at the appropriate performance standard listed below.
- Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
- Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

INSPECTION REPORT COMMENTS

Permit No. Act 007/035

Inspection Date 4/20/94

Please number comments to correspond with topics on previous page.

General Comments Since Jim Comas was in route to the mine site and whereas he had two contract prospective job show me trips, decided not wait for Jim, but to conduct the inspection. Checked with Ann Carney and left notes on Jim's desk before and after completing the inspection.

Outstanding Violations According to the Price Field Office three violations are still outstanding as follows:

N-93-32-05-02-#1 --- Retuse Road/Acid & Toxic Material

N-93-13-02-01 --- Permit Conditions

N-93-26-04-01 --- AML Fees.

A performance standard compliance issue was observed. It involved a silt fence and should a rainfall event occur, the disturbed runoff would not be treated. However, no signs of runoff could be detected. Nevertheless, the silt fence that treated disturbed runoff adjacent to the "deep" had become detached at the bottom. The silt fence was about 20' long and is the primary treatment. The area does not drain to a sediment pond. Photos were taken to show the lack of maintenance. NOV 94-26-2-1 was issued on 4/20/94 with an abatement date of 4/27/94.

INSPECTION REPORT COMMENTS

Permit No. Act 007/035

Inspection Date 4/20/94

Please number comments to correspond with topics on previous page.

A weir was installed about a week ago adjacent to the railroad culvert inlet. In order to gain access, the contractor on party who installed the weir had to remove the silt fence for access purposes. In reinstalling the silt fence the work was not properly completed and the bottom part of the silt fence was not embedded in soil material.

Signs & Markers. I.D. sign adjacent to the loop road is in need of routine maintenance. In discussing this matter with Mr. Comas he stated that a new sign is to be erected in the future and is on order.

Sediment Control Measures were functional except for silt fence noted on pages 2 & 3.

Water Monitoring Three weirs have been installed below the refuse pile. The location and flow readings are shown below:

Upper - located Below Old Floding Station: 1.4

Middle - Railroad Culvert Inlet: 2.4

Lower - Adjacent To Permit Boundary: Didnt take reading

Coal Mine Waste. The area approved by the Division for waste material, non combustible coal refuse is covered in Book 4 chapter 9. Submission of 9/15/93 provided for the storage

breaks reject material from mining the refuse pile that will not meet fuel needs, but not classified as low coal waste and waste material from the crusher. During the inspection the operator had prospective contractors on site for foundation studies. Drainage from this site will report to sediment pond via a designed protected ditch. Revision of 4/1/94 is pending Division review.

Contemporaneous Reclamation: completed on the 3rd & 4th lifts and seeded 3/17/94 shows excellent germination of sweet clover. Some thistle emergence was observed along with grasses.

Roads. Since the last inspection operator has regraded most of the ditches.
