Re: Coarse Refuse Haul Road Reclamation, Sunnyside Cogeneration Associates,  
Sunnyside Refuse and Slurry, ACT/007/035-94D, Carbon County, Utah

Dear Mr. Pearce:

The Division has completed a review of the August 22, 1994 permit change application, intended to satisfy requirements of NOV N93-32-5-2 #1 of 2 (Reclamation of the Old Coarse Refuse road). The application is not considered adequate and cannot be approved as submitted. Problems with the submittal center mainly around differences in the amount of cover material to be placed on disturbed areas.

SCA's currently approved plan calls for covering acid/toxic forming materials with 4 feet of suitable cover materials and covering other disturbed areas with 18 inches of suitable cover material. The application for change does not provide adequate justification for reducing these cover requirements. A demonstration or justification for reducing the cover will need to be submitted and approved before lesser amounts of cover could be utilized.

SCA should be aware that NOV abatement requirements still need to be addressed. Reclamation of the Old Coarse Refuse road must proceed as expeditiously as possible. Thank you for your efforts in this regard. Please call me or Henry Sauer, Senior Soil Specialist, if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Daron R. Haddock".

Daron R. Haddock  
Permit Supervisor
