RE: Permit No. ACT/007/035: Sunnyside Cogeneration Associates  
Request for Extension NOV N93-13-2-1  
Engineer's Project No. EC450593

Dear Mr. Helfrich:

Notice of Violation N93-13-2-1 was last extended until 5:00 p.m., Monday, April 17, 1995. This was done on February 6, 1995, in response to a request from SCA on January 13, 1995.

A Final Reclamation Plan was included with the January 13 request. This plant substantially completed the items required for the permit. Only some minor background data remained to be added. Appendix 6-5, which details the plan for characterization of the refuse pile and gathering of data, has now been modified and submitted to the Division for final review.

SCA requested the extension in January to allow time for the Division to review the permits and for SCA to respond to the review. However, SCA has yet to receive a comprehensive technical analysis of the entire permit. In order for SCA to adequately and efficiently respond to the Division's interpretation of the regulations as they apply to the Sunnyside Cogeneration Associates Permit Area, please grant an additional extension which will allow enough time for the Division to review the permit, prepare a written analysis covering SCA's most recent submittals and for SCA to properly respond to the review.

Mr. Joe Helfrich  
Division of Oil, Gas and Mining
