

- Partial
- Complete
- Exploration

Inspection Date: 2/14 & 15/95
 Time: 9:00 am pm to 11:30 am pm
 Date of Last Inspection: 1/11/95

Mine Name: Sunnyside Coprocessor Area County: Carbow Permit Number: Act 007/035
 Permittee and/or Operator's Name: Sunnyside Refuse & Slurry
 Business Address: P.O. Box 10, East Carbow, UT 84520
 Type of Mining Activity: Underground Surface Prep. Plant Other
 State Official(s): Bill Malenick
 Company Official(s): Jim Comas, James T. O'Donnell, Jose Gutierrez
 Federal Official(s): N/A
 Weather Conditions: Clear/Cold - Temp 30's - Ground Conditions - wet
 Existing Acreage: Permitted- 310 Disturbed- 202 Regraded- _____ Seeded- _____ Bonded- 202
 Increased/Decreased: Permitted- _____ Disturbed- _____ Regraded- _____ Seeded- _____ Bonded- _____
 Status: Exploration / Active / Inactive / Temporary Cessation / Bond Forfeiture
 Reclamation (Phase I / Phase II / Final Bond Release / Liability _____ Year)

REVIEW OF PERMIT, PERFORMANCE STANDARDS & PERMIT CONDITION REQUIREMENTS

Instructions

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For complete inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check N/A.
 - b. For partial inspections check only the elements evaluated.
2. Document any noncompliance situation by referencing the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

inspection report

INSPECTION REPORT COMMENTS

Permit No. Act 007/035

Inspection Date 2/14 & 15/95

Please number comments to correspond with topics on previous page.

General Comments. With the recent ownership change, an acting plant manager has been appointed. He now is responsible for the mining operation, power plant, and has consultants reporting to him. Having someone on site who is responsible for the whole in my opinion is a positive move. Whereas before no one on site was responsible for the different parts.

Permit. The update of the new corporate structure was discussed with company officials noted on page 1 herein. In addition discussed the matter with Mr. Burnham. He provide all ^{with} the most recent update. Currently the firm's attorney is taking the followup action requested by the Division. Some mgt restructuring has taken place and some records as a followup to this action is not totally in place. Mr. Burnham assured me that they are working on this matter with a high priority designation. All this information is essential to updating the AVS system.

Sediment Ponds. Observed pasture, railcut, and coal refuse

sediment ponds. All ponds contained a small amount of runoff.

Coal Mine Waste. Rock that is separated from coal and is temporarily stored adjacent to the crusher was observed. Some of such rock material was also stored adjacent to the loop road. The operator has tested the rock material and provided the undersigned with lab results. These samples were taken in January 1995.

Roads. From recent storms, some ancillary roads were muddy. Observed trucks using the haul roads. As a result of this activity noted where breaker reset rock, crushed to gravel size had been placed on two corners on roads A & E (Appendix 9-5, MRP). On road E near the crusher breaker rock on the road covered an area about 170' long, 10' wide and a depth of 2"-3" maximum. On road A adjacent to the interface with road E, breaker rock on the road covered an area about 110' long, 12' wide and a maximum depth of 3".

Since broken rock was placed on the roads A&E as noted in the instant report, issued NOV 95-26-1-1 on 2/15/95, The abatement requirements are as follows:

- (1) Clean and remove broken rock from roads A&E,
- (2) Place broken rock in the approved designated spoil area, and
- (3) The abatement must be completed by 5pm 2/22/95.

All runoff from roads A&E report to the pasture pond. Pasture pond had a small amount of runoff. The decant and emergency spillway showed no signs of recent discharge. The plan provides for the disposition of broken rock. It is approved to be stored in a controlled manner in the approved and designated spoil area.
