INSPECTION REPORT COMMENTS

Permit No. Act 007/035

Inspection Date 6/17/96

Please number comments to correspond with topics on previous page.

General Comments. A partial inspection was completed and only included a field inspection of environmental control measures on the upper permit area.

No surface coal mining was taking place at the time of the inspection and the power plant was undergoing repairs. Therefore, no active mining operation was observed at the mine nor the tipples.

Permit. A permit amendment is currently being evaluated that proposes minor changes to the DQSM water monitoring requirements. The undersigned discussed the amendment with Ken Wyatt and is in the process of being approved.

Diversion. A diversion adjacent to an auxiliary road and north of the spoil pile needs routine preventative maintenance. Most of the road ditches and other diversions had recently been cleaned.

Sediment Pond. All the sediment ponds on the

mine were dry. The maintenance work on the clear water pond inlet had not started. Mr. Netz stated he is in the process of obtaining the services of a contractor who will perform the preventative maintenance. Spill Pile Very little if any additional spill material has been placed on the spill pile. Some soil material that was piled near some heavy equipment is to be ~~hauled~~ and placed on the pile.

Contemporaneous Reclamation. Mr Netz stated that Susan White and another person recently observed the reclamation on the coarse refuse road.

Roads. In response to my enquiry Mr Netz stated they have not placed any coal refuse on the haul roads. As the record will show the operator demonstrated and the Division approved the use of such material as haul road surfacing.
