DIVISION OF OIL GAS & MINING FIELD VISIT FORM

Date: June 11, 1997

Time: 1:00 p.m. to 3:00 p.m.

Mine: ACT/007/035, ^{#5} Sunnyside Refuse and Slurry

DOG M Staff: Pam Grubaugh-Littig, Randy Harden, Susan White, Robert Davidson, and Bill Malencik

Other Attendees: Rusty Netz and Scott Carlson

Purpose:

The coarse refuse haul road was evaluated for a Phase I Bond release.

Observations:

The reclaimed haul road was in good condition only, some minor erosion was evident. Only minor amounts of refuse were observed at the bottom of the reclaimed area. The vegetation appeared established with good growth and diversity.

Recommendations:

Phase I Bond does not have any vegetation requirements for release, therefore, no comment is given in regards to this matter. However, the operator should consider collecting data to evaluate the vegetation for a Phase II Bond release.
