NOTICE

A notice of intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Company Name: Sunnyside Cogeneration Associates (SCA)
Location: State Route 123, #1 Power Plant Road

Project Description: SCA operates an electric power plant near Sunnyside, Utah. The Sunnyside Plant is a waste coal-fired steam electric generating plant located in Carbon County. SCA is requesting that the hours of operation limit for the emergency generator be increased. Currently the Approval Order DAQE-AN0096020-06, states that the hours of operation shall not be more than 52 hours of operation per rolling 12-month period. SCA has requested that it be increased to the standard hours of operation for emergency generators. The standard limit is 500 hours per year.

Carbon County is an attainment area of the National Ambient Air Quality Standards (NAAQS) for all pollutants. New Source Performance Standards (NSPS) Subpart D (Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units) applies to the Sunnyside plant. National Emission Standards for Hazardous Air Pollutants (NESHAP) and Maximum Achievable Control Technology (MACT) regulations do not apply to the Sunnyside plant. Title V of the 1990 Clean Air Act applies to the Sunnyside plant. The Title V operating permit for this source shall be amended prior to the operation of the approved modifications. The emissions, in tons per year, will change as follows: PM10 + 0.12, NOx + 3.61, SO2 + 1.22, CO + 0.83, and VOC + 0.11. The changes in emissions will result in the following, in tons per year, potential to emit totals: PM10 = 142.91, NOx = 771.20, SO2 = 1289.26, CO = 261.96, VOC = 18.17.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before October 22, 2006, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at nmeli@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.
Date of Notice: September 28, 2006
