2. Signs and Markers

The mine ID sign is located adjacent to the tibble on a light pole. The MSHA Refuse Pile sign was also checked during the inspection and contained the required information.

4.a Hydrologic Balance: Diversions

A small amount of sediment has fallen off the road in front of the road culvert leading into the storage pad used for the star point surge material. The material should be removed to prevent the sediment from compounding in front of the culvert inlet.

6. Disposal of Excess Spoil, Fills, Benches

Excess spoil pile remains active. The potential for reaching the design capacity this year is being evaluated.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile appeared stable.
