

- Legend**
- Existing Contours
 - Phase 1 Rough Grading Contours
 - Phase 2 Rough Grading Contours
 - Phase 1 Boundary
 - Phase 2 Boundary

Notes:

1. These plans are not for construction.
2. Existing contours and Rough Grading outlines shown are approximate. Contractors will generally smooth Rough Grade to blend into existing grade at the edges of the disturbed areas.
3. Rough Grade should generally drain as indicated by the Rough Grade contours and the drainage plans, Sheets 8-3A-E.
4. Maximum Rough Grading slope is to be 33% (3:1).
