The identification signs were inspected and contained the required information as required in the R645 Coal Rules.

3. Topsoil

The topsoil piles were inspected with no signs of wind or water erosion.

4.a Hydrologic Balance: Diversions

The refuse piles were inspected with no hazardous conditions noticed during the inspection. No new material had been placed on the piles during the inspection.

8. Noncoal Waste

The site was clear of non-coal waste materials.

16.b Roads: Drainage Controls

The road diversions and culverts were open and would function during a storm event.

18. Support Facilities, Utility Installations

No new support facilities were constructed since the last inspection.
