1. Permits, Change, Transfer, Renewal, Sale

1. There are no pending amendments with the Division at this time.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules.

3. Topsoil

The topsoil piles were snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated.

4.a Hydrologic Balance: Diversions

I inspected the diversions and culverts throughout the property. Some snow was within the diversions and culverts. These structures were function as designed. Some diversions had water flowing within them.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The diversions were functioning as design. The refuse pile is inactive at this time. Road was snow covered.

8. Noncoal Waste

I did not notice any non-coal waste materials. The mine site is completely snow covered.

16.a Roads: Construction, Maintenance, Surfacing

Roads were wet, muddy, and snow covered.
