Re: Cyprus-Plateau Mining Corporation
Exploration Permit EXP/007/038 Modification

Dear Mr. Demczak:

2

In relation to the above referenced project, as stated in Mr. Grimes letter to you dated April 21, 1994, Kathy Trott, from the Corps of Engineers, and myself met with Mr. Grimes at the site of the low water crossing on Willow Creek that will be used to access the existing tunnels. We were in agreement that an alteration permit would not be necessary because there would be no modification to the beds or banks of the stream, and no significant damage to the stream environment at the crossing. As a result, we indicated to Mr. Grimes that the crossing could be used for this project.

Should you have any additional questions or comments relating to our involvement, please feel free to contact me.

Sincerely,

Mark P. Page
Regional Engineer

cc: Kathy Trott - Corps of Engineers
Ben Grimes - Cyprus-Plateau Mining Corporation
