Re: Cyprus Plateau Mining Corporation - Willow Creek Mine, Additional Copies of Permit Application Package Revisions

*ACT/007/038 #2*

Dear Mr. Haddock:

In response to a letter in late April from Pam Grubaugh-Littig (copy attached for reference), you will find enclosed two additional copies of Permit Application Package revisions submitted to the Utah Division of Oil, Gas and Mining (UDOGM) between late February and the end of July of this year. I apologize for the delay in providing the requested materials. Essentially all my time in the last several months has been devoted to completing an EIS for a new gold mine in Nevada and the need for the revision copies was not indicated as a priority.

Please note that we are providing copies of all revisions identified in the April letter as well as any revisions submitted subsequent to the last date noted in the letter (April 22, 1996) through the end of July when TerraMatrix's involvement in the project essentially ended. Also please note the following corrected and additional dates for permit revision submittals to UDOGM (actual date is date on submittal letter, referenced date is probably date submittal was stamped in at UDOGM):

<u>Date Referenced in April Letter</u>	<u>Actual or Added Date</u>
March 20, 1996	Same
April 2, 1996	March 30, 1996
April 10, 1996	April 4, 1996
April 11, 1996	April 9, 1996
April 22, 1996	April 17, 1996
	April 22, 1996
	July 11, 1996
	July 16, 1996
	July 31, 1996

Revision materials should be inserted into the permit document beginning with the earliest submittal and progressing through the most recent, with any superseded materials being

discarded. To assist you in understanding the sequence of revision submittals, I have also attached five copies of the updated Permit Chronology for replacement in Section 2.3 of the Permit document. Hopefully this submittal addresses your needs for required update materials for the BLM and OSMRE copies. Please feel free to contact me with any questions.

Sincerely,
