Re: Cyprus Plateau Mining Corporation - Willow Creek Mine, Technical Adequacy Responses and Supporting Materials

Dear Mr. Haddock:

Based on the UDOGM's Technical Adequacy comments, we have reviewed the Willow Creek Mine Permit Application as submitted in May 1995 and revised in August and September 1995 to address the UDOGM's Administrative Completeness concerns. This submittal responds to the UDOGM's Technical Adequacy concerns and includes specific responses and supporting revised permit materials.

Responses to the UDOGM's Technical Adequacy concerns are presented in comment/response format to facilitate your review and aid in any future references which may be necessary. As noted in the individual responses, various components of the permit application package have been revised, expanded, or supplemented consistent with the technical adequacy responses, and these revised materials are included as a component of this response submittal. Revised materials will be identified and placement instructions provided in a Summary of Revisions/Additions to be forwarded in a follow-up package, which will include the remaining text revisions, exhibits, and all maps.

We feel that the accompanying responses and supporting materials should address remaining permit issues and provide the basis for a determination of permit adequacy and subsequent permit approval. We understand that it is your intent to proceed immediately with your review of these responses. As you proceed with your review, please feel free to contact me with any further questions or if you require additional clarification. We appreciate your cooperation and timely review and look forward to your response.

Sincerely,

TerraMatrix Inc.

for Jerry M. Nettleton
Project Manager
