Subject: Willow Creek Mine

Pete,

As a followup to our telephone conversation this morning, I am sending you this email regarding the Willow Creek Mine.

Presently the mine is still being ventilated. We intend on ventilating the mine in accordance with MSHA regulations. RAG will continue to recover equipment as under the purview with AmWest. RAG will continue to evaluate every option available until it becomes apparent that the only option is permanent cessation.

When the fate of the Willow Creek Mine is determined, PMC will notify the Division accordingly. In the mean-time, PMC will continue to work closely with the Division, MSHA, and BLM.

I hope this addresses any concerns.

Johnny
