Dear Ms. Littig,

This letter is notification that Plateau Mining Corporation is beginning the process of reclaiming the surface facilities at the Willow Creek Mine. A contract has been awarded the Nielson Construction for the first of several reclamation phases over the next few years. This first step will include the dismantling of the conveyor belt system from the mine's portals to the preparation plant's raw coal handling system.

Nielson Construction will mobilize and begin work this month. The work should be completed by year's end. Note that the scope of work also includes the demolition and reclamation of Adit #1 and two substations in Hardscrabble and Sowbelly Canyons. Reclamation at these sites is under the Castle Gate permit.

If you have any questions or require any further information, please contact either Johnny Pappas or myself.

Sincerely,

John Borla
