Subject: Water Monitoring Well Abandonment, Star Point and Willow Creek Mines

Hello Everyone,

Plateau Mining Corporation anticipates commencing the abandonment of water monitoring wells and the Gentry Mountain air shaft on September 23. This day will be mainly moving and staging the material for the abandonment activities. The water wells will be abandoned under the direct supervision of a licensed well driller. The Gentry Mountain area will be done first to avoid the hants and adverse weather conditions.

I will be away from my office this Thursday and Friday. As I get more definitive dates and times I will relay this to you folks.

Thanks,
Johnny
