Pam,

Regarding the aforementioned, PMC received the conditional approval letter on September 21 and is requesting a three week extension to the September 24 deadline. Before PMC can submit its clean copies it needs the soil sample locations from Ms. Burton so that they can be shown on the maps. Apparently Ms. Burton is out of the office until September 24, which precludes our ability to get the locations until then.

Furthermore, if PMC can receive the results from BYU within the extension timeframe, then the results can be appropriately incorporated into the MRP at this time instead of as a separate submittal.

You may have also heard about me leaving PMC for employment elsewhere and the additional time will help during this transition period. I will be handing the reins to Mr. Dennis Ware who is looking forward to working with the Division and continuing our great working relationship.

Gratefully,

Johnny Pappas
